Trend Micro

ANTIVIRUS for MAC

Online Protection

As a Mac user, you need privacy protection when shopping, banking, and socializing online. Macs are no longer immune to viruses and other Internet threats. **Trend Micro™ Antivirus for Mac®** safeguards your digital life and protects it against online threats, dangerous websites, and identity thieves. Its unique security, designed to safeguard your privacy on social networks like Facebook, Google+, Twitter, and LinkedIn. With Trend Micro, you can relax and enjoy your digital life safely.

KEY BENEFITS

Trend Micro Antivirus for Mac software provides essential web protection. It does the following:

Blocks Dangerous Websites
Protects against viruses and spyware by identifying suspicious links in websites, social networks, emails, and instant messages

Guards against Identity Theft
Detects spam emails containing phishing scams that can trick you into revealing personal information

Protects Your Privacy on Facebook, Google+, Twitter, and LinkedIn
Identifies privacy settings on social sites that may expose your personal information and lead to identity theft

Provides Safe Surfing
Prevents you from visiting dangerous websites so you can browse with confidence

Protects Kids Online
Lets you restrict online access for kids, protecting them from inappropriate websites

WHY IT'S BETTER

Based on 25+ years of security software industry leadership and expertise, Trend Micro Security delivers:

- The **fastest web protection** against new Internet threats[1]
- **Top-rated** defense, blocking sites trying to trick you into downloading malware[1]
- Protection against **250+ million threats** per day
